WEB PROGRESS – QA TEST SUITE

Test environment · scenario matrix · smoke, functional & regression test cases · traceability

Document information

Application	Web Progress (Installer, Data Migration Tool, Web site)
Build under test	V2.0.2 (requirements targeted for 2.0.3)
Document	SQA Test Suite – test environment, scenarios and test cases
Prepared by	Abdelrahman Ali – SQA Engineer
Date	09/11/2026
Based on	Product user manual (v2.0.2); WebProgress_Bug_Tracker.xlsx (38 bugs); WebProgress_Requirements.xlsx (WP-01 … WP-06)
Deployment modes	On Deck (one machine, 'Both') · Remotely / Online (Server + Vessel + Third-party viewer)
Scopes	Pipeline · Structure (SC) · Pipeline & Structure

Contents

Test Environment	Machine roles, minimum specs, prerequisites and topology – fill in actual machine details
Scenario Matrix	Configurations to cover: mode × scope × migration settings × vessels
Test Cases	All test cases with execution columns (Status, Actual Result, Tested By, Date, Build)
Traceability	Every bug and requirement mapped to its test cases, with live coverage and result
Summary	Live execution dashboard by suite and module
Legend	How to use the workbook and value meanings

Revision history

Rev	Date	Prepared by	Reviewed by	Build	Description
1.0	09/11/2026	Abdelrahman Ali		V2.0.2	Initial test suite

TEST ENVIRONMENT

Roles from the User Manual §2, §5, §6, §7. Yellow cells: fill in the actual machines used for this test cycle.

Machine roles

Env ID	Role	Installer option	Purpose	Mode	Machine name	IP / URL	OS	SQL Server
ENV-01	On Deck PC	Both	Runs the site (IIS + DB) and the Data Migration uploader on one machine	On Deck				
ENV-02	Server machine (Real IP)	Web Server	Hosts the site and DB; public real IP; envconfig.js points Api/Hub to the real IP	Remotely				
ENV-03	Vessel machine	Data Uploader	Onboard, internet access; runs Data Migration and uploads to the server URL	Remotely				
ENV-04	Third-party machine	—	Any internet PC; browser only, opens http://<Real IP>/<App> or alias	Remotely				

Minimum machine specification (manual §2)

Item	Required	Recommended		Actual ENV-01	Actual ENV-02	Actual ENV-03		
RAM	16 GB DDR4	32 GB+						
GPU	NVIDIA GTX 1660 or equivalent	Lower spec GPU also works						
Storage	SSD ≥ 512 GB	—						
CPU	Intel i7 (modern multi-core)	—						
Display	1920×1080	Dual monitors						
Network	Ethernet	Internet for Remotely mode						
Web server	IIS Manager	—						

Software prerequisites (manual §3–§4)

#	Prerequisite	Source / how			Installed? (Y/N)	Version	Checked by	Notes
1	.NET Framework 3.5 (NetFX3)	DISM with C:\sources\sxs (offline) or prerequisites installer						
2	IIS features listed in §3.2	Windows Features or prerequisites installer						
3	IIS URL Rewrite module	Assists\Web\rewrite_amd64_en-us.msi						
4	.NET Framework 4.8	Assists\dotNet4.8						
5	SQL Server + Project DB / Logging / Processing / SC DBs	Restore from .bak (Auto-Detect) if supplied						
6	Web Progress licence	Tech support						

7	3D model JSON (Structure scope)	Converted by tech support → <App>.Api\References				
8	Verification script Phase 6/6 all ENABLED	Install-WindowsFeatures-Final.ps1				

Topology – Remotely (Online) mode

[ENV-03 Vessel – Data Uploader] → internet → [ENV-02 Server – IIS site + SQL DB, real IP] ← internet ← [ENV-04 Third party – browser]

Data Migration on the vessel reads Project DB / Logging / Processing / SC DBs locally and pushes to http://<Real IP>/<App>.

On Deck mode: everything runs on ENV-01; site URL http://<machine>/<App> (localhost and machine IP must both work – bug_3).

TEST SCENARIO MATRIX

Each row is one configuration to set up and run the linked test cases against. Fill Status and Notes per cycle.

Scenario ID	Mode	Machines	Scope	Divided into blocks	KP unit	Events source	Vessels	Focus	Key test cases	Status	Tested on (build/date)	Notes
SCN-01	On Deck	ENV-01	Pipeline	No	Meter	Logging	1	Baseline pipeline install, upload and dashboards	TC-SMK-002, 004–007	Not Run		
SCN-02	On Deck	ENV-01	Pipeline	Yes ('_')	Meter	Logging	1	Divided pipes: grouping, no duplicates, first-cycle display	bug_19, bug_20 regression	Not Run		
SCN-03	On Deck	ENV-01	Pipeline	No	Kilometre	Logging	1	KP unit in km, including change after first upload	bug_33	Not Run		
SCN-04	On Deck	ENV-01	Pipeline	No	Meter	Processing	1	Events from Processing DB; switch source	bug_32	Not Run		
SCN-05	On Deck	ENV-01	Structure (SC)	—	—	—	1	Structure only: tasks, findings, 3D model	TC-SMK-008/009, Structure tests	Not Run		
SCN-06	On Deck	ENV-01	Pipeline & Structure	Yes	Meter	Logging	1	Full scope on one machine	All smoke	Not Run		
SCN-07	On Deck	ENV-01	Pipeline	No	Meter	Logging	2	Two vessels, overlapping pk_pipeid, home page	bug_10, bug_22, bug_25	Not Run		
SCN-08	On Deck	ENV-01	Pipeline & Structure / Pipeline	No	Meter	Logging	2	Vessel 1 Pipeline+SC, Vessel 2 Pipeline only	bug_17	Not Run		
SCN-09	Remotely	ENV-02 + ENV-03	Pipeline	No	Meter	Logging	1	Remote upload to real-IP server	bug_26, Online tests	Not Run		
SCN-10	Remotely	ENV-02 + ENV-03	Pipeline & Structure	Yes	Meter	Logging	1	Remote full scope with 3D model on server	Online + Structure tests	Not Run		
SCN-11	Remotely	ENV-02 + ENV-03 + ENV-04	Pipeline & Structure	No	Meter	Logging	1	Third-party viewing by IP and alias	TC-SMK-011, Online tests	Not Run		
SCN-12	Remotely	ENV-02 + ENV-03	Pipeline	No	Meter	Logging	1	Network loss and server down during upload	Resilience tests	Not Run		
SCN-13	Remotely	ENV-02 + ENV-03 + ENV-04	Pipeline & Structure	No	Meter	Logging	1	Reports uploaded on vessel, viewed in office	bug_37	Not Run		
SCN-14	On Deck	ENV-01	Pipeline	No	Meter	Logging	1	Partially logged pipe status	bug_38	Not Run		

TEST CASES

112 test cases. Execution columns (yellow header) are filled per run. Links in [ ] trace to the Bug Tracker / Requirements.

TC ID	Suite	Module	Test Title	Preconditions	Test Steps	Expected Result	Mode	Scope	Priority	Linked Bug / Req	Status	Actual Result	Tested By	Test Date	Build	Notes
TC-SMK-001	Smoke	Prerequisites	Prerequisites installer completes and verification report is all ENABLED	Clean Windows machine; C:\sources\sxs present; admin rights	1- Run WebProgressPrerequests-Installer.exe as admin 2- Run Install Windows Features (.NET + IIS) 3- Install URL Rewrite MSI 4- Run Install-WindowsFeatures-Final.ps1 in elevated PowerShell	Phase 6/6 Verification Report lists every required feature as ENABLED; no errors	Both	Pipeline & Structure	High		Not Run					
TC-SMK-002	Smoke	Installer	Install in 'Both' mode completes with confirmation and opens the site	Prerequisites installed (§3 / §4 of manual); SQL Server reachable; Project DB + Logging/Processing DBs available	1- Run WebProgress.Installer.exe as admin 2- Choose Both 3- Enter Campaign Name, Web App Name, DB Connection 4- Press Install 5- Answer YES to open URL	Progress reaches 100%; 'Installation Finished' confirmation shown; site opens on the login page	Both	Pipeline & Structure	High	[bug_1]	Not Run					
TC-SMK-003	Smoke	Web – Login	Login with the default admin account	Site installed; default credentials per manual §5	1- Open site URL 2- Enter default user and password 3- Sign in	Main dashboard loads (empty data before first upload); no errors in page	Both	Pipeline & Structure	High		Not Run					
TC-SMK-004	Smoke	Data Migration Tool	Start pipeline upload and get successful migration log	Site installed; Project DB available	1- Run Data Migration tool as admin 2- Enter Vessel Name, tick Pipeline 3- Connect Project DB and choose project 4- Press Start Upload	Logs table shows 'Migration of … had been succeeded' for each entity (Vessel, Asset, Events, Offshore Logging …)	Both	Pipeline	High		Not Run					
TC-SMK-005	Smoke	Web – Main	Main page shows uploaded progress	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Open MAIN page	Pipeline Progress, Pipeline Anomalies, Structure Progress, Structure Anomalies cards show values; KP bar and donut render	Both	Pipeline & Structure	High		Not Run					
TC-SMK-006	Smoke	Pipeline – Progress	Pipeline Progress page loads KPIs and charts	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Open PIPELINE > PROGRESS	KPI cards, KP Progress bar, Pipeline Progress donut, Event and Anomaly Distribution charts render with data	Both	Pipeline	High		Not Run					
TC-SMK-007	Smoke	Pipeline – Findings	Events table loads in Findings	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Open PIPELINE > FINDINGS 2- Select a pipeline	Events table shows rows for the selected pipeline; Anomalies tab opens	Both	Pipeline	High		Not Run					
TC-SMK-008	Smoke	Structure	Structure Progress page loads	Web Progress installed (Both) with Structure scope; SC DB uploaded; 3D model JSON placed in <App>.Api\References	1- Open STRUCTURE > PROGRESS	Completed Structures, Completed Tasks, Events, Anomalies cards and charts render	Both	Structure (SC)	High		Not Run					
TC-SMK-009	Smoke	Structure – 3D Model	3D model opens from Structure Findings	Web Progress installed (Both) with Structure scope; SC DB uploaded; 3D model JSON placed in <App>.Api\References	1- Open STRUCTURE > FINDINGS 2- Open the 3D Model panel	3D model loads and can be rotated/zoomed	Both	Structure (SC)	High		Not Run					
TC-SMK-010	Smoke	Reports	Add a DPR report	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Open REPORTS > DPR 2- Add Report: name, comment, PDF 3- Save changes	Report appears in the list with pending-approval state	Both	Pipeline & Structure	High		Not Run					
TC-SMK-011	Smoke	Online Method	Third-party machine opens the site by the server real IP	Server (Web Server) + Vessel (Data Uploader) set up per manual §6	1- On any internet machine open http://<Real IP>/<App> 2- Log in	Site loads with vessel data uploaded from the vessel machine	Remotely	Pipeline & Structure	High		Not Run					
TC-SMK-012	Smoke	Data Migration Tool	New data appears after one upload interval	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site; interval 00:10	1- Log new data in the source DB 2- Wait one interval 3- Refresh site	New data and updated Last Update appear after one cycle	Both	Pipeline	High		Not Run					
TC-FUN-001	Functional	Prerequisites	Missing C:\sources\sxs folder is detected	C:\sources\sxs not present	1- Run prerequisites installer as admin 2- Start Install Windows Features	Installer reports the missing SXS source clearly and does not continue silently	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-002	Functional	Prerequisites	Installer run without admin rights	Standard user	1- Double-click WebProgressPrerequests-Installer.exe (not as admin)	UAC prompt or clear message that admin rights are needed; no partial install	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-003	Functional	Prerequisites	All IIS features in manual §3.2 are enabled	Prerequisites installer completed	1- Open Turn Windows features on or off 2- Compare with manual §3.2 list	Every feature listed in §3.2 (App Dev, Common HTTP, Health, Performance, Security, Mgmt Tools, IIS6 compat) is ticked	Both	Pipeline & Structure	High	[bug_18]	Not Run					
TC-FUN-004	Functional	Prerequisites	Restore databases from .bak with Auto-Detect	.bak files in Assists folder	1- Enter SQL connection 2- Click Auto-Detect BAK Files 3- Restore	All .bak files found and restored; DBs visible in SQL Server	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-005	Functional	Web Progress Installer	Startup options show the right fields	Installer open	1- Select Data Uploader 2- Select Web Server 3- Select Both	Each option shows only the fields it needs (Data Uploader: no DB/site fields; Web Server & Both: Campaign, App Name, scope, KP, pipes, DB)	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-006	Functional	Web Progress Installer	Mandatory field validation	Installer open, Both selected	1- Leave Campaign Name empty, press Install 2- Repeat for Web App Name and DB Connection	Install blocked with a message naming the missing field	Both	Pipeline & Structure	High		Not Run					
TC-FUN-007	Functional	Web Progress Installer	Invalid DB credentials	Installer open	1- Press DB button 2- Enter wrong password 3- Submit	Clear connection error; installation cannot start	Both	Pipeline & Structure	Medium	[bug_5]	Not Run					
TC-FUN-008	Functional	Web Progress Installer	'Override Database If It Exists' behaviour	A DB with the same name exists	1- Install with checkbox unticked 2- Repeat with checkbox ticked	Unticked: warning, existing DB kept. Ticked: DB recreated after confirmation	Both	Pipeline & Structure	High		Not Run					
TC-FUN-009	Functional	Web Progress Installer	Only the selected scope is shown on the site	Prerequisites installed (§3 / §4 of manual); SQL Server reachable; Project DB + Logging/Processing DBs available	1- Install Both with Pipeline scope only 2- Open site	Only Pipeline tabs appear; Structure tab hidden	Both	Pipeline	Medium	[bug_4]	Not Run					
TC-FUN-010	Functional	Web Progress Installer	Total KP and total pipes accept valid numbers only	Installer open	1- Enter text, negative, zero, decimal values in Total KP and Total pipes	Invalid values rejected with message; valid positive numbers accepted	Both	Pipeline	Medium		Not Run					
TC-FUN-011	Functional	Web Progress Installer	Web App Name with spaces / special characters	Installer open	1- Enter 'My App#1' as Web App Name 2- Install	Name validated (blocked with message) or sanitised so the IIS site/URL works	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-012	Functional	Web Progress Installer	Data Uploader option installs only the Data Migration tool	Vessel machine	1- Choose Data Uploader 2- Install	Data Migration tool installed with desktop shortcut; no IIS site created	Remotely	Pipeline & Structure	High		Not Run					
TC-FUN-013	Functional	Web Progress Installer	Web Server option installs site and DB only	Server machine with real IP	1- Choose Web Server 2- Fill Campaign, KP, pipes, App Name, DB 3- Install	IIS site (<App>.Api, <App>.Hub) and DB created; site reachable locally	Remotely	Pipeline & Structure	High		Not Run					
TC-FUN-014	Functional	Web Progress Installer	3D model folder hierarchy is created by the installer	Prerequisites installed (§3 / §4 of manual); SQL Server reachable; Project DB + Logging/Processing DBs available	1- Install with Structure scope 2- Check inetpub\wwwroot\<App>.Api\References	References\3DModels folder exists without manual creation	Both	Structure (SC)	Low	[bug_28]	Not Run					
TC-FUN-015	Functional	Web Progress Installer	Source DB connection available during install	Prerequisites installed (§3 / §4 of manual); SQL Server reachable; Project DB + Logging/Processing DBs available	1- Run installer (Both) 2- Look for source DB field	Source DB can be connected so the site has data before running Data Migration	Both	Pipeline & Structure	Medium	[bug_6]	Not Run					

TC ID	Suite	Module	Test Title	Preconditions	Test Steps	Expected Result	Mode	Scope	Priority	Linked Bug / Req	Status	Actual Result	Tested By	Test Date	Build	Notes
TC-FUN-016	Functional	Data Migration Tool	Vessel name required and Rename Vessel works	Data Migration open	1- Press Start Upload with empty Vessel Name 2- Enter name, upload once 3- Use Rename Vessel	Empty name blocked with message; renamed vessel shows the new name on the site	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-017	Functional	Data Migration Tool	Pipeline / Structure checkboxes enable their sections	Data Migration open	1- Tick/untick Pipeline 2- Tick/untick Structure	Pipeline Settings and Structure Settings sections enable/disable to match	Both	Pipeline & Structure	Low		Not Run					
TC-FUN-018	Functional	Data Migration Tool	Pipeline divided into blocks with '_' separator	Pipes named PL1_Part1, PL1_Part2 …	1- Tick Pipeline divided into blocks 2- Separator '_' 3- Start upload	Parts grouped under PL1 on the site; each part appears once	Both	Pipeline	High	[bug_20]	Not Run					
TC-FUN-019	Functional	Data Migration Tool	Wrong block separator	Pipes named PL1_Part1 …	1- Enter separator '-' 2- Start upload	No wrong grouping; user warned that no pipe names match the separator	Both	Pipeline	Medium		Not Run					
TC-FUN-020	Functional	Data Migration Tool	KP unit Kilometre matches tblpipes	tblpipes KP stored in km	1- Choose Start/End KP unit = Kilometre 2- Upload 3- Change unit after first upload, upload again	Pipe lengths and KP bar correct; unit change after first upload updates the site	Both	Pipeline	Medium	[bug_33]	Not Run					
TC-FUN-021	Functional	Data Migration Tool	PosLog unit and KP step 200 m	Data Migration open	1- Choose PosLog unit 2- Set step 200 3- Upload	Logged KP on site matches source logging at the chosen step	Both	Pipeline	Medium		Not Run					
TC-FUN-022	Functional	Data Migration Tool	Events from Logging Database	Prerequisites installed (§3 / §4 of manual); SQL Server reachable; Project DB + Logging/Processing DBs available	1- Display Events from: Logging Database 2- Upload	Findings show events from the Logging DB	Both	Pipeline	High		Not Run					
TC-FUN-023	Functional	Data Migration Tool	Switch events source to Processing Database	Previous upload from Logging DB	1- Stop upload 2- Switch to Processing Database 3- Start upload	Findings show events from the Processing DB	Both	Pipeline	Medium	[bug_32]	Not Run					
TC-FUN-024	Functional	Data Migration Tool	Anomaly media from Source Workpack folder	Job folder with media	1- Set Source Workpack folder to job folder 2- Upload 3- Open anomaly on site	Anomaly media (images/clips) open from the site	Both	Pipeline	Medium		Not Run					
TC-FUN-025	Functional	Data Migration Tool	SC DB and Workpack folder to 02-Installations	SC DB available	1- Click SC DB, choose server/DB 2- Set Workpack folder to …\02-Installations 3- Upload	Structure data and media appear on the site	Both	Structure (SC)	High		Not Run					
TC-FUN-026	Functional	Data Migration Tool	Upload interval validation (HH:MM)	Data Migration open	1- Enter 00:00, 25:99, text, 00:05	Invalid values rejected; default is 00:10; 00:05 accepted and editable in all modes	Both	Pipeline & Structure	Medium	[bug_8]	Not Run					
TC-FUN-027	Functional	Data Migration Tool	Controls stay responsive during upload	Upload running	1- Press Stop 2- Edit a field 3- Close tool	All controls respond; no frozen spinner	Both	Pipeline & Structure	High	[bug_21]	Not Run					
TC-FUN-028	Functional	Data Migration Tool	Logs table records errors with Reason	Upload running	1- Make source DB unreachable for one cycle 2- Restore it	Error row with Reason added; logs table stays visible; next cycle succeeds	Both	Pipeline & Structure	High	[bug_14]	Not Run					
TC-FUN-029	Functional	Data Migration Tool	Save and load profile	Data Migration filled	1- Save profile 2- Close and reopen 3- Load profile	Tool opens blank or asks to load a profile; loaded profile restores all settings and logs	Both	Pipeline & Structure	High	[bug_9] [bug_15]	Not Run					
TC-FUN-030	Functional	Data Migration Tool	Deleted profile is not shown on reopen	Saved profile exists	1- Close tool 2- Delete profile file 3- Reopen	No deleted profile name in title; tool opens blank	Both	Pipeline & Structure	Medium	[bug_11]	Not Run					
TC-FUN-031	Functional	Data Migration Tool	Two vessels with different scopes	Two Data Migration instances	1- Vessel 1: Pipeline + SC 2- Vessel 2: Pipeline only 3- Upload both	SC scope shown only for Vessel 1	Both	Pipeline & Structure	High	[bug_17]	Not Run					
TC-FUN-032	Functional	Data Migration Tool	Upload resumes after network interruption	Remote upload running	1- Disconnect vessel internet for one cycle 2- Reconnect	Failed cycle logged with reason; next cycle uploads the missed data with no duplicates	Remotely	Pipeline & Structure	High		Not Run					
TC-FUN-033	Functional	Data Migration Tool	Partially logged pipe is not shown as completed	Pipe 5 km; logging covers start/end only (2 km)	1- Upload 2- Open Pipeline Progress	Pipe shown In Progress with correct %, not Completed	Both	Pipeline	High	[bug_38]	Not Run					
TC-FUN-034	Functional	Web – Login	Invalid credentials and protected URLs	Site installed	1- Log in with wrong password 2- Log out, open a page URL directly	Error message, no access; direct URL redirects to login	Both	Pipeline & Structure	High		Not Run					
TC-FUN-035	Functional	Web – General	Last Update pill shows last sync time	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Check header Last Update after an upload cycle	Shows date/time of last sync (office time) and updates after each sync	Both	Pipeline & Structure	High	[bug_34]	Not Run					
TC-FUN-036	Functional	Web – General	Home page with several vessels	2+ vessels uploading	1- Open home page 2- Enter a vessel, press back	All vessels listed with icon and name; navigation links stay valid	Both	Pipeline & Structure	High	[bug_12] [bug_13] [bug_25]	Not Run					
TC-FUN-037	Functional	Web – General	Left navigation opens every page	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Click each item: Main, Pipeline (Progress, All Pipes, Trends, Findings), Structure (Progress, All Structures, Findings, Tasks), Reports, Notifications	Each page loads with the right title and no console errors	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-038	Functional	Web – General	Layout at common resolutions	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- View Main and Progress pages at 1920×1080, 1366×768, 1280×720	No overlapping cards or cut text; usable at each size	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-039	Functional	Web – General	Browser compatibility	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Repeat smoke pages in Chrome and Edge (latest)	Same behaviour and layout in both browsers	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-040	Functional	Pipeline – Progress	KPI cards match source data	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Note Completed Pipelines, Completed KPs, Total Events, Total Anomalies 2- Compare with SQL counts on source DBs	All four values match the source data	Both	Pipeline	High		Not Run					
TC-FUN-041	Functional	Pipeline – Progress	KP progress bar and donut percentages	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Compare KP bar total and donut % with logged KP / total KP	Values match within rounding	Both	Pipeline	High		Not Run					
TC-FUN-042	Functional	Pipeline – Progress	Event and Anomaly Distribution charts	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Compare chart counts per code with Findings table filtered by code	Counts match	Both	Pipeline	Medium		Not Run					
TC-FUN-043	Functional	Pipeline – Progress	Card action icons (export / expand)	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Click both icons on each chart card	Each icon performs its action (export / full view) and returns cleanly	Both	Pipeline	Low		Not Run					
TC-FUN-044	Functional	Pipeline – All Pipes	All Pipes lists every pipe with status and %	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Open ALL PIPES	Every pipe from tblpipes listed once with correct status and %	Both	Pipeline	High	[bug_22]	Not Run					
TC-FUN-045	Functional	Pipeline – Trends	Trends page loads	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Open TRENDS	Trend charts render with data over time	Both	Pipeline	Low		Not Run					

TC ID	Suite	Module	Test Title	Preconditions	Test Steps	Expected Result	Mode	Scope	Priority	Linked Bug / Req	Status	Actual Result	Tested By	Test Date	Build	Notes
TC-FUN-046	Functional	Findings – Events Table	Pipeline selector filters events	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Change Pipeline dropdown	Table shows only events for the selected pipeline	Both	Pipeline	High		Not Run					
TC-FUN-047	Functional	Findings – Events Table	Search, column filters and grouping	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Search a known event code 2- Use a column filter 3- Drag a header to the group area	Results filter correctly; grouping by column works and can be removed	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-048	Functional	Findings – Events Table	Reach the last event / anomaly	More than one page of findings	1- Scroll/page to the end of Events 2- Repeat on Anomalies	Last record reachable in both tabs	Both	Pipeline & Structure	Low	[bug_30] [bug_31]	Not Run					
TC-FUN-049	Functional	Findings – Events Table	Header alignment on horizontal scroll	Web Progress installed (Both) with Structure scope; SC DB uploaded; 3D model JSON placed in <App>.Api\References	1- Scroll the events table right	Headers stay aligned with data columns	Both	Structure (SC)	Low	[bug_29]	Not Run					
TC-FUN-050	Functional	Findings – Events Table	Excel / PDF export	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Press Excel export 2- Press PDF export	Files download and contain the table data	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-051	Functional	Structure	Structure KPI cards and task progress	Web Progress installed (Both) with Structure scope; SC DB uploaded; 3D model JSON placed in <App>.Api\References	1- Compare cards and task bar with SC DB counts	Completed Structures, Tasks, Events, Anomalies match	Both	Structure (SC)	High		Not Run					
TC-FUN-052	Functional	Structure – 3D Model	3D model navigation is smooth	Web Progress installed (Both) with Structure scope; SC DB uploaded; 3D model JSON placed in <App>.Api\References	1- Rotate, zoom, pan the model 2- Use toolbar buttons	Smooth response; toolbar works	Both	Structure (SC)	Medium		Not Run					
TC-FUN-053	Functional	Structure – 3D Model	Selecting an event/anomaly moves the 3D view to it	Web Progress installed (Both) with Structure scope; SC DB uploaded; 3D model JSON placed in <App>.Api\References	1- Click an event in Findings 2- Click an anomaly	3D model seeks to the related component	Both	Structure (SC)	High		Not Run					
TC-FUN-054	Functional	Structure – 3D Model	Selecting a task moves the 3D view to it	Web Progress installed (Both) with Structure scope; SC DB uploaded; 3D model JSON placed in <App>.Api\References	1- Open TASKS 2- Click a task	3D model seeks to the task component; finished tasks marked	Both	Structure (SC)	High		Not Run					
TC-FUN-055	Functional	Structure – 3D Model	3D view keeps aspect ratio after restore/maximise	Web Progress installed (Both) with Structure scope; SC DB uploaded; 3D model JSON placed in <App>.Api\References	1- Open Tasks with 3D model 2- Restore down the browser 3- Maximise	Model and details keep their proportions	Both	Structure (SC)	Low	[bug_27]	Not Run					
TC-FUN-056	Functional	Structure – 3D Model	Missing 3D model JSON	No JSON in References	1- Open Structure Findings 3D panel	Clear 'model not available' message; page still usable	Both	Structure (SC)	Medium		Not Run					
TC-FUN-057	Functional	Reports	DPR form validation	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Save with no name 2- Save with no file 3- Upload a non-PDF 4- Upload a large PDF (>20 MB)	Each invalid case blocked with a clear message; large file uploads or shows size limit	Both	Pipeline & Structure	Medium		Not Run					
TC-FUN-058	Functional	Reports	Admin approval of a report	Report added by user	1- Log in as Admin 2- Approve the report 3- Log in as user	Report status becomes approved/available for users	Both	Pipeline & Structure	High		Not Run					
TC-FUN-059	Functional	Reports	Non-admin cannot approve	Report pending	1- Log in as non-admin 2- Try to approve	Approve action not available	Both	Pipeline & Structure	High		Not Run					
TC-FUN-060	Functional	Reports	Report uploaded on vessel is viewable in office	Online method set up	1- Add DPR on vessel machine 2- Open it from office/third-party machine	PDF opens/downloads from the office server	Remotely	Pipeline & Structure	High	[bug_37]	Not Run					
TC-FUN-061	Functional	Reports	Field Reports tab and search	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Open FIELD REPORTS 2- Search a report name	Tab lists reports; search filters list	Both	Pipeline & Structure	Low		Not Run					
TC-FUN-062	Functional	Users	Last Login updates on sign-in	Several accounts	1- Sign in with an account 2- Open Users page	Last Login shows the sign-in time; never-used accounts show 'Never'	Both	Pipeline & Structure	Medium	[bug_35]	Not Run					
TC-FUN-063	Functional	Users	Email must be unique	Users page	1- Edit an account to use an email already in use 2- Save	Save blocked: 'This email is already used by another account'	Both	Pipeline & Structure	High	[bug_36]	Not Run					
TC-FUN-064	Functional	Users	Non-admin cannot manage users	Non-admin account	1- Log in as non-admin 2- Try to open/edit Users	Add/edit/delete not available (confirm role matrix with R&D)	Both	Pipeline & Structure	High		Not Run					
TC-FUN-065	Functional	Notifications	Notifications page and bell badge	Web Progress installed (Both); Data Migration uploader running with pipeline data; logged in to the site	1- Trigger a notifying action (e.g. report added) 2- Check bell and Notifications page	Bell shows new count; notification listed with date	Both	Pipeline & Structure	Low		Not Run					
TC-FUN-066	Functional	Online Method	Server envconfig.js uses the real IP	Web Server installed	1- Edit envconfig.js: Api and Hub lines to http://<Real IP>/<App>.Api/api and .Hub/signalr 2- Open site from another machine	Site and data load remotely	Remotely	Pipeline & Structure	High		Not Run					
TC-FUN-067	Functional	Online Method	Vessel uploader sends data to the server	Server + vessel set up	1- Enter Online Web Progress URL = http://<Real IP>/<App> 2- Start upload	Logs show successful migration; progress appears on server site	Remotely	Pipeline	High	[bug_26]	Not Run					
TC-FUN-068	Functional	Online Method	Third party via DNS alias	Alias configured (e.g. client-alias)	1- Open http://<alias>/<App>	Same site and data as via real IP	Remotely	Pipeline & Structure	Medium		Not Run					
TC-FUN-069	Functional	Online Method	Server unreachable from vessel	Upload running	1- Block server port / stop IIS site 2- Let one cycle run 3- Restore	Clear error logged; tool keeps running and recovers next cycle	Remotely	Pipeline & Structure	High		Not Run					
TC-FUN-070	Functional	Requirement WP-01	Favicon shows company logo	Build with WP-01	1- Open any page 2- Check browser tab	company logo shown instead of the default globe on all pages	Both	Pipeline & Structure	Medium	[WP-01]	Not Run					
TC-FUN-071	Functional	Requirement WP-02	In-progress pipes bar has no horizontal scrollbar	Build with WP-02; short and long pipelines	1- Open Pipeline Progress at 1920, 1366, 1280 widths	No horizontal scrollbar at any width	Both	Pipeline	High	[WP-02]	Not Run					
TC-FUN-072	Functional	Requirement WP-02	Part widths proportional with minimum width	Pipeline with one very short part	1- Compare part widths with their lengths	Widths proportional to length; very short part still visible	Both	Pipeline	High	[WP-02]	Not Run					
TC-FUN-073	Functional	Requirement WP-03	Same pipeline/part terminology everywhere	Build with WP-03	1- Check KPI cards, charts and All Pipes page wording	One consistent term used	Both	Pipeline	Low	[WP-03]	Not Run					
TC-FUN-074	Functional	Requirement WP-04	Saved layout is shared across users and computers	Build with WP-04; two accounts, two PCs	1- User A hides, reorders, resizes columns, sets sort/filter/group 2- Save layout 3- User B opens on another PC	User B sees the same layout	Both	Pipeline & Structure	High	[WP-04]	Not Run					
TC-FUN-075	Functional	Requirement WP-04	Layout saved per project and per grid	Build with WP-04	1- Save different layouts on Events and Anomalies 2- Switch project	Each grid/project keeps its own layout	Both	Pipeline & Structure	High	[WP-04]	Not Run					
TC-FUN-076	Functional	Requirement WP-04	Unsaved layout changes prompt before leaving	Build with WP-04	1- Change layout without saving 2- Navigate away	Prompt to save/discard appears	Both	Pipeline & Structure	Medium	[WP-04]	Not Run					
TC-FUN-077	Functional	Requirement WP-05	Keyboard navigation: arrows, paging, Home/End	Build with WP-05	1- Use arrows, Shift+←/→, PageUp/Down, Home/End, Ctrl+Home/End	Focus moves as specified; focused cell highlighted	Both	Pipeline & Structure	Low	[WP-05]	Not Run					

TC ID	Suite	Module	Test Title	Preconditions	Test Steps	Expected Result	Mode	Scope	Priority	Linked Bug / Req	Status	Actual Result	Tested By	Test Date	Build	Notes
TC-FUN-078	Functional	Requirement WP-05	Keyboard: Enter/Esc, Ctrl+F, Tab, '?' list	Build with WP-05	1- Enter on a row, Esc 2- Ctrl+F 3- Tab through filter row 4- Hover '?'	Details open/close; search focused; filters reachable; shortcut list shown	Both	Pipeline & Structure	Low	[WP-05]	Not Run					
TC-FUN-079	Functional	Requirement WP-06	Export matches the visible layout	Build with WP-06; custom layout and filters	1- Export to Excel 2- Export to PDF	Only visible columns, same order, current filters in both exports	Both	Pipeline & Structure	Medium	[WP-06]	Not Run					
TC-REG-001	Regression	Web Progress Installer	Verify fix: Installer shows 'Installation Finished' and closes on OK	Build V2.0.2+ installed	1- Open WP Installer 2- Choose Both 3- Fill required data 4- Press Install	Show confirmation dialog 'Installation Finished'. On OK, installer closes.	Both	Pipeline & Structure	High	[bug_1]	Not Run					
TC-REG-002	Regression	Web Progress Installer	Verify fix: Confirmation persists when switching installer option	Build V2.0.2+ installed	1- Open WP Installer 2- Choose Both 3- Fill data 4- Press Install 5- Switch to Web Server or Data Uploader	Confirmation message should persist regardless of option change.	Both	Pipeline & Structure	High	[bug_2]	Not Run					
TC-REG-003	Regression	Web Progress Installer	Verify fix: IIS URL works with localhost and machine IP	Build V2.0.2+ installed	1- Open WP Installer 2- Choose Both 3- Fill data 4- Press Install 5- Open IIS & browse URL 6- Replace localhost with IP	URL should work with both localhost and machine IP automatically.	Both	Pipeline & Structure	High	[bug_3]	Not Run					
TC-REG-004	Regression	Web Progress Installer	Verify fix: Database Settings opens without 'Can't get server list'	Build V2.0.2+ installed	1- Open WP Installer 2- Choose Both 3- Press Database Settings	Connection window should open directly without prior error.	Both	Pipeline & Structure	High	[bug_5]	Not Run					
TC-REG-005	Regression	Data Migration Tool	Verify fix: Installer, migration tool and site linked without manual URL edits	Build V2.0.2+ installed	1- Install WP 2- Open IIS & copy URL 3- Open Data Migration 4- Paste & modify URL	Auto-link installer, migration tool, and web page without manual URL editing.	Both	Pipeline & Structure	High	[bug_7]	Not Run					
TC-REG-006	Regression	Data Migration Tool	Verify fix: Upload interval editable in SC mode	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration 3- Choose SC Mode 4- Fill required data	Upload interval should be editable in SC mode.	Both	Structure (SC)	High	[bug_8]	Not Run					
TC-REG-007	Regression	Data Migration Tool – Save Profile	Verify fix: Tool does not auto-load last data without asking	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration 3- Fill data 4- Save profile & close 5- Reopen tool	Tool should open blank or prompt the user to load a saved profile.	Both	Pipeline & Structure	High	[bug_9]	Not Run					
TC-REG-008	Regression	Data Migration Tool	Verify fix: Two Data Migration instances run together	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration for Vessel 1 3- Open another Data Migration for Vessel 2	Multiple Data Migration instances should run simultaneously.	Both	Pipeline & Structure	High	[bug_10]	Not Run					
TC-REG-009	Regression	Web Progress Page	Verify fix: Home icon shown with one vessel	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration 3- Create 1 vessel (Pipeline) 4- Start uploader 5- Check web page	Home page icon should display regardless of vessel count.	Both	Pipeline	Low	[bug_12]	Not Run					
TC-REG-010	Regression	Web Progress Page	Verify fix: Vessel icon and name shown with one vessel	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration 3- Create 1 vessel (Pipeline) 4- Start uploader 5- Check web page	Vessel icon and name should display for any number of vessels.	Both	Pipeline	High	[bug_13]	Not Run					
TC-REG-011	Regression	Data Migration Tool	Verify fix: Logs table survives an unhandled error	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration 3- Trigger any error during Pipeline upload	Logs table should persist and record all events/errors without restarting.	Both	Pipeline	High	[bug_14]	Not Run					
TC-REG-012	Regression	Data Migration Tool	Verify fix: Logs restored when reloading a profile	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration 3- Start upload 4- Save profile & close 5- Reopen & load profile	Logs should be persisted and restored when re-loading a profile.	Both	Pipeline	Medium	[bug_15]	Not Run					
TC-REG-013	Regression	Data Migration Tool	Verify fix: Editing tblpipes during migration does not crash the tool	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration (Pipeline) 3- Start upload 4- Edit start KP of a pipe	Error should be handled gracefully; DB edits should be allowed during migration.	Both	Pipeline	High	[bug_16]	Not Run					
TC-REG-014	Regression	Data Migration Tool	Verify fix: Divided pipes appear after the first cycle	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration 3- Enable pipeline divided 4- Set 00:05 interval 5- Start uploader	Data should appear after the first cycle (5 min).	Both	Pipeline	High	[bug_19]	Not Run					
TC-REG-015	Regression	Data Migration Tool	Verify fix: No duplicate first segment for divided pipes	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration 3- Enable pipeline divided 4- Start uploader 5- Review web page	No duplicate segments; each pipe part should appear exactly once.	Both	Pipeline	High	[bug_20]	Not Run					
TC-REG-016	Regression	Data Migration Tool	Verify fix: Controls responsive after starting the timer	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration (Pipeline+SC) 3- Start uploader	All controls (stop, edit, close) must remain responsive during upload.	Both	Pipeline & Structure	High	[bug_21]	Not Run					
TC-REG-017	Regression	Data Migration Tool	Verify fix: Overlapping pk_pipeid across vessels shows all pipes	Build V2.0.2+ installed	1- Install WP 2- Create Vessel 1 (pipes pk=1–5) 3- Create Vessel 2 (pipes pk=1–3) 4- Start both uploaders	All pipes from all vessels should display correctly regardless of pk_pipeid overlap.	Both	Pipeline	High	[bug_22]	Not Run					
TC-REG-018	Regression	Data Migration Tool	Verify fix: Installer and Data Migration in one workflow	Build V2.0.2+ installed	N/A	Integrate installer and Data Migration Tool into one unified module/workflow.	Both	Pipeline & Structure	High	[bug_23]	Not Run					
TC-REG-019	Regression	Data Migration Tool	Verify fix: Export to CSV asks for a save path	Build V2.0.2+ installed	1- Install WP 2- Open Data Migration 3- Press Export to CSV	A file-browser dialog should allow the user to choose the export path.	Both	Pipeline & Structure	Low	[bug_24]	Not Run					
TC-REG-020	Regression	Data Migration Tool	Verify fix: Home page lists all vessels; back link stays valid	Build V2.0.2+ installed	1- Install WP 2- Create 2+ vessels 3- Start uploaders 4- Press Home Page on web	Home page should always show all vessels and provide stable navigation links.	Both	Pipeline & Structure	High	[bug_25]	Not Run					
TC-REG-021	Regression	Data Migration Tool	Verify fix: Remote 2-machine setup logs and shows pipeline progress	Build V2.0.3+ installed	1-Create Data Uploader by web progress Installer (Data Uploader machine) 2-Create Web server by web progress installer (Web server machine-Real IP) 3-enter name of vessel at data migration tool 4-connect Project DB and start uploader.	should log of Data Offshore logging migrated successfully and also progress of pipeline appeared at web progress page.	Remotely	Pipeline	High	[bug_26]	Not Run					

TRACEABILITY MATRIX

Bugs and requirements → test cases. # Test cases and Test result update live from the Test Cases sheet.

Item ID	Type	Module	Title / Summary	Tracker status	Linked test cases	# Test cases	Executed	Test result
WP-01	Requirement – Enhancement	General UI	Add favicon to browser tab	Open	TC-FUN-070	1	0	Not Run
WP-02	Requirement – New Requirement	Pipeline Progress	In-progress pipes bar fits section without scrollbar	Open	TC-FUN-071, TC-FUN-072	2	0	Not Run
WP-03	Requirement – Enhancement	Pipeline Progress	Consistent pipeline / part terminology	Open	TC-FUN-073	1	0	Not Run
WP-04	Requirement – New Requirement	Findings – Events Table	Save column layout for all users (shared schema)	Open	TC-FUN-074, TC-FUN-075, TC-FUN-076	3	0	Not Run
WP-05	Requirement – New Requirement	Findings – Events Table	Keyboard navigation in Events table	Open	TC-FUN-077, TC-FUN-078	2	0	Not Run
WP-06	Requirement – New Requirement	Findings – Events Table	Export uses the saved layout	Open	TC-FUN-079	1	0	Not Run
bug_1	Bug	Web Progress Installer	Progress bar appears with installing complete but no confirmation message shown; closing only happens after OK on a missing/absent dialog.	Done	TC-SMK-002, TC-REG-001	2	0	Not Run
bug_2	Bug	Web Progress Installer	After install finishes, switching to Web Server or Data Uploader option hides the confirmation message—user has no feedback on completion.	Done	TC-REG-002	1	0	Not Run
bug_3	Bug	Web Progress Installer	Browsed URL from IIS does not work with 'localhost'; user must manually replace it with machine IP.	Done	TC-REG-003	1	0	Not Run
bug_4	Bug	Web Progress Installer	Web page shows both Structure and Pipeline tabs even when only Pipeline scope was selected during install.	Open	TC-FUN-009	1	0	Not Run
bug_5	Bug	Web Progress Installer	Clicking 'Database Settings' shows error 'Can't get server list' before opening the connection window.	Done	TC-FUN-007, TC-REG-004	2	0	Not Run
bug_6	Bug	Web Progress Installer	No field to connect source DB during install, so web page shows no data before running Data Migration Tool.	Blocked	TC-FUN-015	1	0	Not Run
bug_7	Bug	Data Migration Tool	User must manually copy IIS URL and modify it to connect Data Migration Tool to the web page.	Done	TC-REG-005	1	0	Not Run
bug_8	Bug	Data Migration Tool	Upload interval field is disabled in SC mode, preventing the user from starting the uploader.	Done	TC-FUN-026, TC-REG-006	2	0	Not Run
bug_9	Bug	Data Migration Tool – Save Profile	After saving a profile, closing and reopening the tool auto-loads last data without prompting to load the profile.	Done	TC-FUN-029, TC-REG-007	2	0	Not Run
bug_10	Bug	Data Migration Tool	Opening a second migration instance for a second vessel requires closing the first instance first.	Done	TC-REG-008	1	0	Not Run
bug_11	Bug	Data Migration Tool – Save Profile	After deleting a saved profile externally and reopening the tool, the deleted profile name still appears in the window title.	Blocked	TC-FUN-030	1	0	Not Run

bug_12	Bug	Web Progress Page	Home page icon missing when only one vessel is created.	Done	TC-FUN-036, TC-REG-009	2	0	Not Run
bug_13	Bug	Web Progress Page	Vessel icon and vessel name missing on web page when only one vessel exists.	Done	TC-FUN-036, TC-REG-010	2	0	Not Run
bug_14	Bug	Data Migration Tool	Any unhandled error causes the logs table to disappear; it only returns after restarting the tool.	Done	TC-FUN-028, TC-REG-011	2	0	Not Run
bug_15	Bug	Data Migration Tool	Log table contents are lost after closing and reopening the tool, even with a loaded profile.	Done	TC-FUN-029, TC-REG-012	2	0	Not Run
bug_16	Bug	Data Migration Tool	Editing the pipes table in Project DB while migration is running throws an unhandled error and crashes the tool.	Done	TC-REG-013	1	0	Not Run
bug_17	Bug	Data Migration Tool	SC scope appears on both vessels when Vessel 1 has Pipeline+SC and Vessel 2 has Pipeline only.	Blocked	TC-FUN-031	1	0	Not Run
bug_18	Bug	Prerequisites / Setup	No automation script to handle prerequisites (offline install, IIS features, URL Rewrite), increasing setup time significantly.	Open	TC-FUN-003	1	0	Not Run
bug_19	Bug	Data Migration Tool	When 'Pipeline divided into blocks' is enabled with 5-min interval, divided pipes appear only after 2 cycles (10 min) instead of 1.	Done	TC-REG-014	1	0	Not Run
bug_20	Bug	Data Migration Tool	With pipeline divided into blocks, the first segment of every pipe is duplicated on the web page.	Done	TC-FUN-018, TC-REG-015	2	0	Not Run
bug_21	Bug	Data Migration Tool	Loading spinner freezes after starting the timer, preventing stop, edit, or close actions.	Done	TC-FUN-027, TC-REG-016	2	0	Not Run
bug_22	Bug	Data Migration Tool	When two vessels share overlapping pk_pipeid values, the first 3 pipes of Vessel 1 disappear from the web page.	Done	TC-FUN-044, TC-REG-017	2	0	Not Run
bug_23	Bug	Data Migration Tool	The installer and Data Migration Tool are not connected; user must complete two separate workflows.	Done	TC-REG-018	1	0	Not Run
bug_24	Bug	Data Migration Tool	'Export to CSV' for the logs table does not prompt the user to choose a save path.	Done	TC-REG-019	1	0	Not Run
bug_25	Bug	Data Migration Tool	Home page shows empty (no vessels) when 2+ vessels exist; back-navigation link also expires.	Done	TC-FUN-036, TC-REG-020	2	0	Not Run
bug_26	Bug	Data Migration Tool	When create Remotely pipeline web progress with 2 machines (Data Uploader machine - Web Sever machine) will find no logs for Offshore logging at Data Migration tool and no progress appear at web progress page for pipeline progress	Done	TC-FUN-067, TC-REG-021	2	0	Not Run
bug_27	Bug	Web Progress Page	When open Tasks Tab From SC mode and open 3D Model Window then Restore down the opened page then maximize the page will find the aspect ratios of the 3D Model within the viewer do not return to their original state upon restoring the 3D Model	New	TC-FUN-055	1	0	Not Run
bug_28	Bug	Web Progress Page	The required folder hierarchy for the 3D Model is not automatically created during application installation. The user must create it manually.	New	TC-FUN-014	1	0	Not Run
bug_29	Bug	Web Progress Page	Scrolling the events table to the right in SC Findings tab corrupts the table header alignment.	New	TC-FUN-049	1	0	Not Run

bug_30	Bug	Web Progress Page	In SC Findings tab, the user cannot scroll down to see the last event when the list spans more than one page.	New	TC-FUN-048	1	0	Not Run
bug_31	Bug	Web Progress Page	In SC Findings tab, the user cannot scroll down to see the last anomaly when the list spans more than one page.	New	TC-FUN-048	1	0	Not Run
bug_32	Bug	Data Migration Tool	Switching 'Display Events & Anomalies' from Logging DB to Processing DB after initial upload shows no events from Processing DB.	New	TC-FUN-023	1	0	Not Run
bug_33	Bug	Data Migration Tool	Changing Start/End KP Unit to Kilometre after initial upload causes no updates; pipes with KM KP remain invisible.	New	TC-FUN-020	1	0	Not Run
bug_34	Bug	Web Progress Page	The Last Update pill in the header shows no value.	New	TC-FUN-035	1	0	Not Run
bug_35	Bug	Web Progress Page	All accounts show the same Last Login (7/14/2020 4:59 PM) — seeded value.	New	TC-FUN-062	1	0	Not Run
bug_36	Bug	Web Progress Page	Admin and migration accounts share admin@admin.com.	New	TC-FUN-063	1	0	Not Run
bug_37	Bug	Web Progress Page	Reports uploaded on the vessel machine appear in the list, but the PDF stays on the vessel, so office users cannot view or download it.	New	TC-FUN-060	1	0	Not Run
bug_38	Bug	Data Migration Tool	When create pipeline web progress with 1 machines (Both) and add pipe in Data migration tool with logging data 2 KM but the pipe legnth is 5 km and also the start and end kilo is logged and poslog was 200 so the pipe sholuld appear not complated because there are 3 km not logged with the center of the pipe.	New	TC-FUN-033	1	0	Not Run

EXECUTION SUMMARY

All figures are formulas over the Test Cases and Traceability sheets.

Overall

Total test cases	**112**
Executed	**0**
Passed	**0**
Failed	**0**
Blocked	**0**
Execution progress	**0.0%**
Pass rate (of executed)	**0.0%**
Bugs/requirements with no test case	**0**

By suite

Suite	Total	Pass	Fail	Blocked	N/A	Not Run	Pass rate
Smoke	12	0	0	0	0	12	0.0%
Functional	79	0	0	0	0	79	0.0%
Regression	21	0	0	0	0	21	0.0%
Total	**112**	**0**	**0**	**0**	**0**	**112**	**0.0%**

By priority

Priority	Total	Pass	Fail	Blocked	N/A	Not Run	
High	66	0	0	0	0	66	
Medium	32	0	0	0	0	32	
Low	14	0	0	0	0	14	

By module

Module	Total	Pass	Fail	Blocked	N/A	Not Run

LEGEND & HOW TO USE

Field	Value	Meaning
Suite	Smoke	Quick build acceptance – run first on every new build; stop the cycle if any fail
Suite	Functional	Feature behaviour, negative cases and requirement acceptance tests (WP-xx)
Suite	Regression	Re-test of every bug marked Done in the Bug Tracker; steps/expected taken from the tracker
Status	Not Run	Default – not executed in this cycle
Status	Pass	Actual result matches expected
Status	Fail	Actual result differs – log or update a bug and put its ID in Notes
Status	Blocked	Cannot run (environment, dependency or open blocker)
Status	N/A	Not applicable to this build or scope
Mode	On Deck / Remotely / Both	Same values as the Bug Tracker 'Mode' column
Priority	High / Medium / Low	High = core flow or data correctness; Low = cosmetic
Linked Bug / Req	[bug_n] / [WP-nn]	Brackets let the Traceability sheet count links exactly (bug_1 ≠ bug_10)
Yellow cells	—	Inputs to fill per cycle: execution columns, environment details, scenario status
How to run a cycle	1	Fill Test Environment (machines, IPs, versions) and update Build in each executed row
How to run a cycle	2	Run Smoke first; if any High smoke case fails, stop and report
How to run a cycle	3	Run Functional and Regression; filter Test Cases by Module or Mode to batch work by machine
How to run a cycle	4	Check Summary and Traceability; any 'Fail' row should have a bug ID in Notes
Example execution row	TC-SMK-002	Status: Pass · Actual Result: Installed in 4 min, confirmation shown, site opened · Tested By: A. Ali · Test Date: 10/11/2026 · Build: V2.0.3
